SUMMARY

A recent graduate with a passion for frontend development and a strong understanding of HTML, CSS, JavaScript and React. Eager to learn and expand skills in the field of web development. Seeking a challenging role to enhance my skills and contribute to the growth of the organization.

TECHNICAL SKILLS

- HTML5 • CSS3 • Javascript • ReactJs • Responsive Design • Redux • JSON
- C++ • Data Structures and Algorithm • GIT • Firebase • Tailwind CSS • API
- AJAX • DOM Manipulation

PROJECTS

Youtube Clone

- Developed using React and Material UI
- Used Rapid API to populate the app with real video data. This allows you to display trending videos, search for videos and display related videos

E-CART

- Developed and launched an ecommerce website from scratch using React, Redux and Material UI
- Made multiple routes to Show categories, Single products, Carts etc

Connectify

- Developed full stack social media app build using React, Firebase and Redux.
- Implemented User-friendly interfaces, optimized for both Desktop and mobile.
