SUMMARY

A recent graduate with a passion for front-end development and a strong understanding of HTML, CSS, JavaScript and React. Eager to learn and expand skills in the field of web development. Seeking a challenging role to enhance my skills and contribute to the growth of the organization.

TECHNICAL SKILLS

- HTML5 • CSS3 • Javascript • ReactJs • Responsive Design • Redux
- C++ • Data Structures and Algorithm • GIT • Firebase • Tailwind CSS

PROJECTS

Youtube Clone
- This is a project built using React.js and Material UI.
- Used Rapid API to populate the app with real video data. This allows you to display trending videos, search for videos and display related videos

E-CART
- E Commerce shopping cart developed using React.Js, Redux toolkit and Material UI
- State is managed using Redux
- Made multiple routes to Show categories, Single products, Carts etc

Connectify
- Full stack social media app build using React, Firebase and Redux
- Sign In and Login functionality is implemented to ensure users a secure platform
